Bonn, 13.09.2021

Dear Parents,

as you have already read in the media reports, the quarantine regulation in NRW has been changed.

## Positive test pool

Thus, in the case of a positive test pool, the quarantine now generally only apply to the infected person.

This means for our school:

In the event of a positive pool test, you will be notified by me via your class teacher via email.

On the following day, you must test your child at home with the pre-registered individual lollipop test and hand it in at the school gate at Donatusstraße between 8:00 am and 9:00 am. There will be only distance learning for the children on that day.

Once you receive the results of the retest from the lab, please be kind and inform the class teacher and me. All children who have a negative test result will be allowed to participate in face-to-face classes again starting the following day.

I must report the children who have been tested positive to the Health Department.

In rare cases, a false positive test result may occur during pool testing. In this case, the Bonn Health Department has now determined that only a negative test result from the single lollipop test is needed and that no further PCR test by a doctor is necessary. Thus, after receiving the negative lollipop test result, the children can come back to school the next day.

## Church services

Beginning Tuesday, Sept. 14th 2021, children will again attend church services in specific group constellations. The group constellations are as follows:

Class 1a and Class 4a (Mentorship).

Class 1b and Class 4b (Mentorship)

Class 2a and Class 2b

Class 3a and class 3b

The classes go to church from school in the morning.

This way we can give the children another piece back to normality.

With kind regards

Uta Becker
